

catchy - The all in one pest control & monitoring system for greenhouse, indoor and net house farming

Advantages:

- Easy to use and set up
- Glue already applied, no need for brushing on sticky adhesives
- Sticky on both sides
- Monitors and controls flying stages of specific pests
- Allows early detection of initial infestations
- Reduces insecticide spraying
- Reduces insecticide residues
- IPM compatible
- Highly effective trapping even in dusty conditions
- Efficacious once set up for at least 6 months

**BASED ON A NOVEL
HIGHLY EFFECTIVE
ADHESIVE DEVELOPED
BY *Dāvik***

- **Catchy Yellow** for effective trapping of the flying stages of tobacco white fly, flying adult aphids and adult leaf miners. Effective also against adult stages of shore flies and fungus gnats which develop in the growing matrix.
- **Catchy Blue** for effective monitoring and control Western Flowers Thrips and other thrips species.

Catchy is recommended for use in greenhouses, tunnels & net houses, for the following crops & operations:

- Vegetable & ornamental Seedling Nurseries
- Seeded and vegetative herbs
- Microgreens and sprouts
- Vegetable crops: Eggplant, capsicum pepper, hot peppers
- Fresh Herbs: Parsley, coriander/cilantro, mint, sweet basil
- Leafy greens: Lettuce, spinach, arugula
- Strawberries
- Ornamentals: Flowering pots, orchids, potted plants
- Cannabis
- Indoor hydroponic farming
